

Waste Awareness Day 16th November 2016

The theme of today's Eco day was Waste Awareness. Pupils and staff from the whole school took part in the event.

We found out about the recycling process at the Envirosort centre, composting our fruit waste in the wormery and what happens to our black bin waste. We estimated how long things take to decompose and were shocked to find out that there are 4000 tips in constant use in this country.

The Envirominnies awarded the energy saving plaque to Hawthorns class and reminded everyone what can be recycled in school. We finished the morning by making some pen pots out of recycled milk bottles.
